Description

Pelvic Inflammatory Disease (PID) is a serious infection of the female reproductive organs, often caused by untreated sexually transmitted infections (STIs), poor hygiene, or bacterial spread from the vagina to the uterus, fallopian tubes, or ovaries. In Nigeria, PID is one of the leading causes of infertility, chronic pelvic pain, and ectopic pregnancy if left untreated.

The **Kedi PID Treatment Solution** combines **Gynapharm** and **Reishi** to fight infection, relieve inflammation, and restore reproductive health. This powerful herbal combination not only treats symptoms but also strengthens the immune system, ensuring long-lasting wellness for women.

Key Benefits

- Fights harmful bacteria and vaginal infections
- Reduces pelvic pain, swelling, and abnormal discharge

- Restores balance to the female reproductive system
- Prevents complications such as infertility and ectopic pregnancy
- Boosts immunity and overall body defense against infections
- 100% natural, safe, and effective herbal formula

Recommended Kedi Products for PID

- **Gynapharm** – powerful herbal formula for vaginal infections, inflammation, and reproductive health support
- **Reishi** – immune-boosting supplement that strengthens the body's defense system and supports faster healing
